Service Manual

Model No.: 23M901

Contents	Page
1. Caution	2-5
2. Product Specification	6-8
3. Parts List (BOM)	9-40
4. Alignment Procedures	41-46
5. Block Diagram	47
6. Circuit Schematic Diagram	48-65
7. PCB Layout	66
8. Explode View Diagram	67-68

This manual is the latest at the time of printing, and does not include the modification which may be made after printing, by the constant improvement of product.

➤ SCHNEIDER ELECTRONICS GMBH-GERMANY

1. CAUTION

CAUTION:

Use of controls, adjustments or procedures other than those specified herein may result in hazardous radiation exposure.

CAUTION
RISK OF ELECTRIC
SHOCK DO NOT OPEN.

CAUTION: TO REDUCE THE RISK OF ELECTRICAL SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

The lightning flash with arrowhead symbol, with an equilateral triangle is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to the person.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

WARNING: TO REDUCE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

➤ SCHNEIDER ELECTRONICS GMBH-GERMANY

IMPORTANT SAFETY INSTRUCTIONS

CAUTION:

Read all of these instructions. Save these instructions for later use. Follow all warnings and instructions marked on the audio equipment.

1. Read Instructions- All the safety and operating instructions should be read before the product is operated.
2. Retain Instructions- The safety and operating instructions should be retained for future reference.
3. Heed Warnings- All warnings on the product and in the operating instructions should be adhered to.
4. Follow Instructions- All operating and use instructions should be followed.

FOR YOUR PERSONAL SAFETY

1. When the power cord or plug is damaged or frayed, unplug this television set from the wall outlet and refer servicing to qualified service personnel.
2. Do not overload wall outlets and extension cords as this can result in fire or electric shock.
3. Do not allow anything to rest on or roll over the power cord, and do not place the TV where power cord is subject to traffic or abuse. This may result in a shock or fire hazard.
4. Do not attempt to service this television set yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.
5. Never push objects of any kind into this television set through cabinet slots as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock. Never spill liquid of any kind on the television set.
6. If the television set has been dropped or the cabinet has been damaged, unplug this television set from the wall outlet and refer servicing to qualified service personnel.
7. If liquid has been spilled into the television set, unplug this television set from the wall outlet and refer servicing to qualified service personnel.
8. Do not subject your television set to impact of any kind. Be particularly careful not to damage the picture tube surface.
9. Unplug this television set from the wall outlet before cleaning. Do not use liquid cleaners or aerosol cleaners. Use a damp cloth for cleaning.
- 10.1. Do not place this television set on an unstable cart, stand, or table. The television set may fall, causing serious injury to a child or an adult, and serious damage to the appliance. Use only with a cart or stand recommended by the manufacturer, or sold with the television set. Wall or shelf mounting should follow the manufacturer's instructions, and should use a mounting kit approved by the manufacturer.
- 10.2. An appliance and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the appliance and cart combination to overturn.

PROTECTION AND LOCATION OF YOUR SET

11. • Do not use this television set near water ... for example, near a bathtub, washbowl, kitchen sink, or laundry tub, in a wet basement, or near a swimming pool, etc.
- Never expose the set to rain or water. If the set has been exposed to rain or water, unplug the set from the wall outlet and refer servicing to qualified service personnel.
12. Choose a place where light (artificial or sunlight) does not shine directly on the screen.
13. Avoid dusty places, since piling up of dust inside TV chassis may cause failure of the set when high humidity persists.
14. The set has slots, or openings in the cabinet for ventilation purposes, to provide reliable operation of the receiver, to protect it from overheating. These openings must not be blocked or covered.
 - Never cover the slots or openings with cloth or other material.
 - Never block the bottom ventilation slots of the set by placing it on a bed, sofa, rug, etc.
 - Never place the set near or over a radiator or heat register.
 - Never place the set in a "built-in" enclosure, unless proper ventilation is provided.

PROTECTION AND LOCATION OF YOUR SET

- 15.1. If an outside antenna is connected to the television set, be sure the antenna system is grounded so as to provide some protection against voltage surges and built up static charges, Section 810 of the National Electrical Code, NFPA No. 70-1975, provides information with respect to proper grounding of the mast and supporting structure, grounding of the lead-in wire to an antenna discharge unit, size of grounding conductors, location of antenna discharge unit, connection to grounding electrode, and requirements for the grounding electrode.

EXAMPLE OF ANTENNA GROUNDING AS PER NATIONAL ELECTRICAL CODE INSTRUCTIONS

- 15.2. Note to CATV system installer : (Only for the television set with CATV reception)

This reminder is provided to call the CATV system installer's attention to Article 820-40 of the NEC that provides guidelines for proper grounding and, in particular, specifies that the cable ground shall be connected to the grounding system of the building, as close to the point of cable entry as practical.

16. An outside antenna system should not be located in the vicinity of overhead power lines or other electric lights or power circuits, or where it can fall into such power lines or circuits. When installing an outside antenna system, extreme care should be taken to keep from touching such power lines or circuits as contact with them might be fatal.
17. For added protection for this television set during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the antenna. This will prevent damage due to lightning and power-line surges.

OPERATION OF YOUR SET

18. This television set should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supply at your home, consult your television dealer or local power company. For television sets designed to operate from battery power, refer to the operating instructions.
19. If the television set does not operate normally by following the operating instructions, unplug this television set from the wall outlet and refer servicing to qualified service personnel. Adjust only those controls that are covered in the operating instructions as improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the television set to normal operation.
20. When going on a holiday : If your television set is to remain unused for a period of time, for instance, when you go on a holiday, turn the television set "off" and unplug the television set from the wall outlet.

IF THE SET DOES NOT OPERATE PROPERLY

21. If you are unable to restore normal operation by following the detailed procedure in your operating instructions, do not attempt any further adjustment. Unplug the set and call your dealer or service technician.
22. Whenever the television set is damaged or fails, or a distinct change in performance indicates a need for service, unplug the set and have it checked by a professional service technician.
23. It is normal for some TV sets to make occasional snapping or popping sounds, particularly when being turned on or off. If the snapping or popping is continuous or frequent, unplug the set and consult your dealer or service technician.

FOR SERVICE AND MODIFICATION

24. Do not use attachments not recommended by the television set manufacturer as they may cause hazards.
25. When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer that have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock, or other hazards.
26. Upon completion of any service or repairs to the television set, ask the service technician to perform routine safety checks to determine that the television is in safe operating condition.

4. Alignment Procedure

SUMMARIZATION:

The panel in this model is LG PHILIPS 30" LC300W01 A3P6, whose max-luminance is at 450 cd/m². Analog parts adopt VCT3834A with Teletext function, inner multi-system Comb-filter, MCU and TCU for Teletext, extra 4M Flash EEPROM and 4M SRAM Teletext EEPROM. IF Amplifier adopts TDA9886T Multi-system PLL IC, MSP3411G for Nicam, and FS European Frequency which supports PAL DK BG I, SECAM BG/DK, SECAM L system. Digital parts adopts SAGE Project, Scaller chip which supports VGA/DVI input in main chassis part. TV input channel adopts AD9883A+FLi2200 to support A/D switches and Deinterlace Progressive processing. Scaller output adopts LVDS switch IC SN75LVDS83, which will switch LVDS to PANEL CN1 Socket. INVERTER comprises by two groups +24V power suppliers and signal switching controller.

ALIGNMENT INSTRUCTION:

1. Adjustment of Analog Chassis Parts

In 30 inch LCD TV, Analog Chassis Parts are comprised of three main boards:

- A. Main-signal Processing Board, which is including Video, Audio, Code, and Teletext process of sub-signal, Board named: 40-3026WS-MA* (* =A. B. C. D.)
- B. IF Amplifier Board, named: 40-LS3026-TU* (* =A. B. C. D.)
- C. Power Amplifier Board, named: 40-3026WS-AM* (* =A. B. C. D.)

I> Checking of IF Amplifier Board

Procedures* *

- 1* *Connecting IF Amplifier Board (without shield cover) to P002 in Switching Board via VGA* *
- 2* *Switching on the Displayer, + 3V red light will be on in RC receiving board. Press "Standby" in RC, the red light will be off. Applying Factory Signal to see whether the sound, Nicam, and searching channel are OK* *
- 3* *Pressing* * key in RC to enter into User Menu, pressing pin* 6* 4* 0* 5* keys to Factory Menu, and select AGC Menu. Setting switching mode to NORMAL, AGC to 14, pressing "EXIT" to exit* *
- 4* *Switching off the Displayer. Taking out IF Amplifier, and soldering shield cover* *

II> Checking of Analog Main Board

Procedures* *

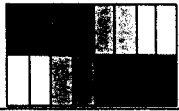

- 1* *Inserting P1, P2, P14 in Digital Board to P1001, P1002 and P5540 in Analog Board* *
- 2* *Connecting Computer to S5504 via COM connector, turning off the reset switch in the connector* *
- 3* *A. Setting PC mode in Digital Board;
B. Switching on the unit with RC;
C. After Screen is on, running FLASH PROGRAM for 2 seconds in Computer Communication Program;
D. Turning on the reset switch in the connector, then carrying out the program to burn* *
- 4* *After burned, please take out the S5504 connector* *
- 5* *Switching off→Reset→power on with RC, pressing "0" key and "OK" key to enter TV mode, the Noise Signal will be displayed, press* * in RC to enter into User Menu, and setting OSD to ENGLISH or other languages* *
- 6* *Making an elementary setting in PICTURE menu:
Brightness ---- 50, Contrast ---- 70, Color ---- 40, Tint ----10
- 7* *Pressing "OK" to save and "exit"* *
- 8* *Pressing "i" and "CH-" to select and "CH+" to enter into PROGRAM menu, pressing "CH-" to select "SEARCH >", and pressing "VOL +" to searching channels. Press EXIT to exit when finished* *
- 9* *Checking all channels to see whether the sound and picture are OK or not. Signal should be switched after applying SCART signal. Input and output function should be checked in SCART 1 & SCART 2. There is not output function in SCART 3. (* 0* key in RC to open menu, "V" key to OK)

2. Adjustment of Digital Board

Procedures* *

- 1* * A. Inserting P1 (8pins) in Digital Board to P1001 in Analog Main Board;
B. Connecting P14 in Digital Board to P5540 in Analog Main Board via 10Pins Line;
C. Connecting P24 in Digital Board to P1004 in Analog Main Board via line;
D. Inserting INVERTER switch Plug to P7 (Pin 3-5);
E. Connecting P2 in Digital Board to P1002 in Analog Main Board via line;
- 2) Inserting DC Plug in Extra Power Supplier to P18 in Digital Board, turning on the main power switch to electrify CPU (3.3V) in Digital Board;

- 3) A. Switching on the Unit using RC;
B. Electrifying Analog Board with 12V, +5V to IC JACASM in Digital Board simultaneously;
C. After several seconds, sound and picture will be OK. (TV mode is in normal mode without SCART Signal)
- 4) Applying TV signal (Gray Scale and Color Bar Signal), pressing "0", "6", "4", "0", "5" in RC, the AD9883 menu will be displayed, please setting the data as following:

R	97	} For reference only. (As different screen, the data are different, please setting the data to make the Gray Scale normal.)	
G	98		
B	98		
BRIG	183		
CON	50		

Gray scale and color bar signal

Pressing EXIT to exit

- 5) 1. Applying VGA signal, press 0 in RC to choose PC mode and pressing "OK" to confirm. Switching to VGA mode and selecting VGA to Gray 16 Scales.
2. Pressing "0", "6", "4", "0", "5" in RC to enter into Factory Mode, setting the data as below:

JAGASM of VGA:	
R	93
G	103
B	98
BRIG	183
CON	50

For reference only.
(As different screen, the data are different,
please setting the data to make the Gray
Scale normal.)

Pressing EXIT to exit

3. Pressing 1 in RC to enter into the User menu to setting the following items when applying VGA signal:

Language	:	English
BRIGHT	:	
CONTRAST	:	
PHASE	:	
	:	
	:	
	:	
AUTO	:	

Gray 16 Scales
Brightness 45%, Max-Dark Scale is Black
Contrast 75%, Max-Bright Scale isn't over loading
A/D Phase No adjusting ripple

Vertical Center: (fluctuant Symmetry)

Horizontal Center: (Right and Left Symmetry)

Horizontal Breadth: Obtain the edge exactly with Cross signal

Pressing "OK" to save and EXIT to exit

* Note: Best Resolution 1024X768 60Hz mode.

6) DVI checking

Procedures

1. Inserting DVI plug into P10 in Digital Board
2. Pressing 0 in RC to enter into signal menu, pressing "CH+/CH-" to choose "DVI" and "OK" to enter into DVI mode
3. Applying the kinds of testing signal, whether they all can be identified and the output are normal in DVI signal sources
4. Entering into main signal menu and setting into the "TV" mode
5. Taking out DVI plug and shutting off AC power supply.

3. Adjustment of Complete LCD TV

Procedures

1. Adjustment of AGC

1. Power on the Unit and applying the TV signal sources.

TV signal sources setting as below

f=48.25MHz

System: PAL B/G

Signal: Full color bar

Intension: 65dB

2. Pressing 1 key in RC to enter into User Menu, pressing pin 6 4 0 5 keys to Factory Menu, pressing < key to select item, "V+& V-" to adjust the data. Setting AGC data to 14 to obtain the Noise of Screen Signal is at minimum.

DVSS: ON

3. Setting BURN IN at On

(Analog Board is on when no signal, Normal User mode is OFF)

LCD TV TCL Ver. 1.22B/13/10/2003 (Update irregularly)

Auto Format 4:3

Tuner AGC 14

Transparent OSD 66

DVSS ON

Burn-in Mode ON

Min.volume.1% 10

Sound curve.10% 64

Sound curve.20% 86

Sound curve.40% 105

Sound curve.80% 121

Sound curve.100% 127

4. Pressing EXIT to exit.

II> Adjustment of White Balance in VGA mode

- *1 • Applying VGA signal, 1024 X 768 60Hz, switching signal source to PC mode, 9300K.
- *2 • Choosing White Signal, using Color Temperature Instrument or White Balance Instrument to test the color coordinate.
- *3 • Pressing "0", "6", "4", "0", "5" key in RC to enter into Factory Mode, pressing "CH+", "CH-" to select item, "V+", "V-" to adjust R• G• B data to obtain $x=284 \pm 5$ •
 $Y=299 \pm 5$ •
- *4 • 7000K $X=305 \pm 15$ • $Y=320 \pm 15$ (no use now)
- *5 • 7500K $X=299 \pm 15$ • $Y=315 \pm 15$ (no use now)

III> AUTO Adjustment of User Setting in VGA mode

- *1 • Applying Square Signal, pressing • \rightarrow key in RC to enter into User Menu.
- *2 • Pressing "CH+", "CH-" to select "AUTO" item, and "V+" to active the auto adjustment then screen will be dark instantly. If finished, screen will be ok automatically.
- *3 • If auto adjustment lost or some disturb/noise in screen, please adjust PHASE by manual.
 Applying signal modes •
 640 X 480 (60, 72, 75, 85Hz)
 720 X 400 (60, 70Hz)
 800 X 600 (60, 75, 85Hz)
 1024 X 768 (60, 75, 85Hz)
 1280 X 1024 (60, 75, 85Hz)
 To do the checking and auto adjustment separately when applying the kinds of signals, if no problem exists, it is unnecessary to adjust the data in EEPROM.

IV> Adjustment of White Balance in TV mode.

- *1 • Applying SCART White Signal, using White Balance Instrument to test.
- *2 • Pressing "0", "6", "4", "0", "5" key in RC to enter into Factory Mode, pressing "CH+", "CH-" to select item, "V+", "V-" to adjust R• G• B data to obtain $X=0.284$, $Y=0.299$, color temperature: 9300, Luminance> 400cd.
- *3 • Pressing• EXIT• to exit.

• > Checking Complete LCD TV

- *1 • Applying TV signal to check whether AGC can work normal. • 40~100dB TV signal).
 If AGC is abnormal, please do fine tuning.
 (If overloading, please lower AGC Value)
- *2 • Applying SCART signal to check whether the input and output of SCART can work normal in R• G• B• Y/C• SCART, 16:9/4:3 mode.
- *3 • Applying VGA signals to checking:
 640 X 480 (60, 72, 75, 85Hz)
 720 X 400 (60, 70Hz)

800 X 600 (60, 75, 85Hz)
 1024 X 768 (60, 75, 85Hz)
 1280 X 1024 (60, 75, 85Hz)

*4 • Checking PIP in TV Signal (VGA mode)

- a. Pressing • 0• • to choose PC mode and• OK• to enter into VGA mode, applying VGA signal.
- b. Pressing \rightarrow key in RC to active PIP function, pressing this key continuously to scale up the PIP picture and disappeared circularly , there are four scales.
- c. Pressing " \leftarrow " key to locate the PIP picture from Top-left, Top-right, Bottom-right, Bottom-left and center circularly.
- d. Pressing \rightarrow key in RC to close the PIP when the picture is in largest scale.
- d. Press Green Key in RC can switch the PIP signal source.

*5 • Checking PIP in DVI mode

- Pressing • 0• • to choose PC mode and• OK• to enter into DVI mode.
 Repeat *4 • to check PIP scale and location.

*6 • Safety Checking

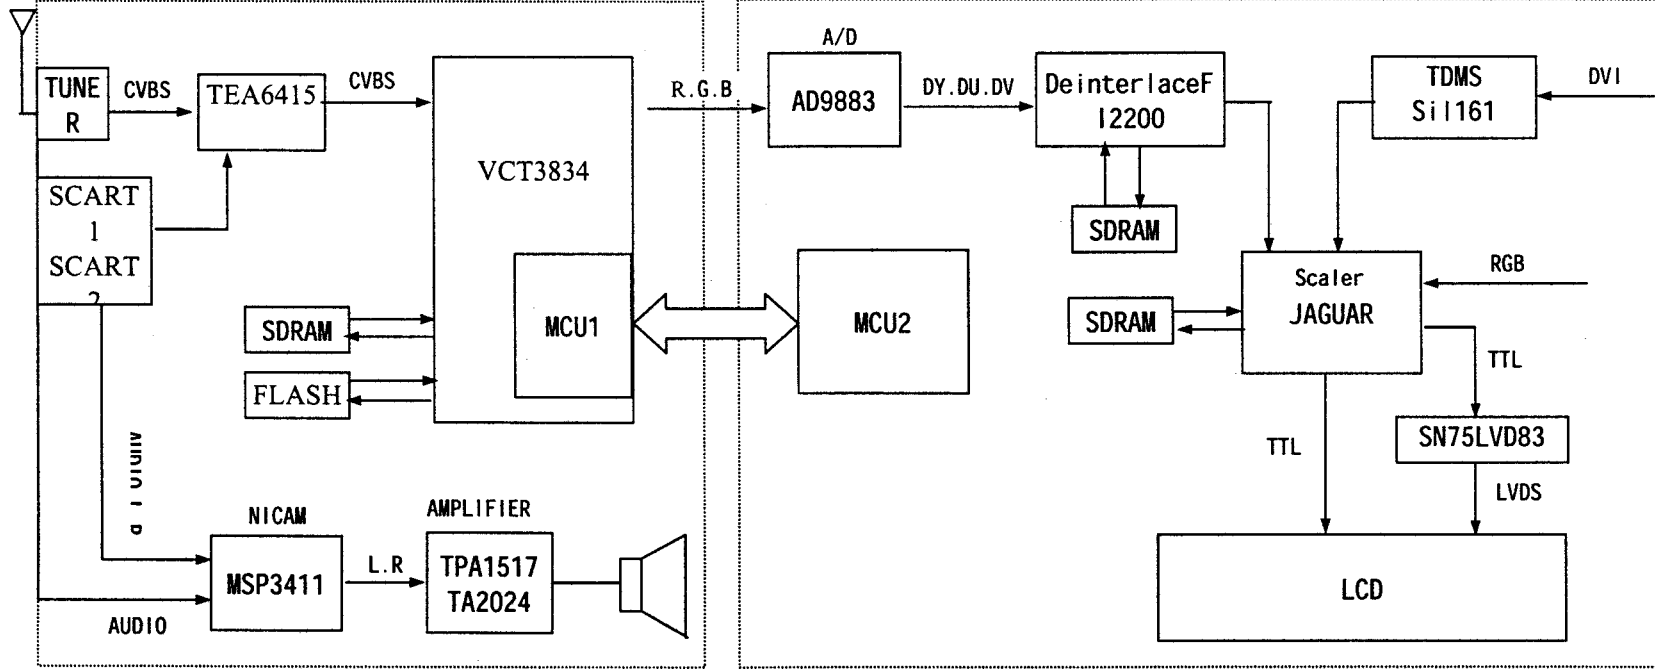

- a. AC 3000V; b. Resistance> 4M Ω

*7 • Default data setting:

Applying factory signal, setting the data to default when in best picture, best sound and so on.

Picture Default Value setting: (Only for reference)				Sound Default Value setting: (Only for reference)	
	TV/SCART	RGB	VGA	Volume	35
Brightness	50%	55%	40%	Treble	50
Contrast	80%	40%	75%	Base	50
Color	50%	Position: 30%		Balance	Center
Contour	20%			Base	Normal
Tone	Center			AVC	off
